

Electronic Display Solutions for
CLUBS

Computronics has a variety of LED, LCD & Plasma electronic display solutions for clubs.

LED displays combine low power and low maintenance with unparalleled visibility, making them an excellent choice for promotions and communicating with club patrons.

LED display applications for clubs:

Outdoor Displays 1 2 3 8

LED signs provide unique opportunities to attract attention and convey information to passing traffic. Outdoor applications include LED displays on pylons and wall fascias. LED displays are also effective in displaying parking conditions.

Foyer Displays 4 5 6

LED information and directory board systems are designed to provide the combination of an eye catching high tech image with functionality. Messages can be updated instantly with user-friendly software to display welcome messages, event programs, promotions, directions, announcements and more.

Venue & Decor Displays 9 10

Add ambience and functionality to your decor by creating focus and discussion points with LED displays. Large RGB screens and LCD/Plasma units can be used to display live or recorded video and images. Highlight venue doors with instructions and promotions in LED.

Restaurant & Bistro Displays 11

Update your menu as often as you like and increase long range visibility with a LED Menu Board System. Combine the power of LCD (images & video) with LED (text) with an Animator Pro unit to promote specials.

Gaming Displays 12 13

Computronics specialises in the manufacture of LED Jackpot Displays and Keno Boards. Displays are supplied through major link operators.

Leisure & Sport Displays 14 15 16

LED displays can be used to provide information to patrons regarding fitness facilities, session times, locations and more. Update your sporting club activities with the latest in electronic scoreboards and RGB replay screens.

Discover the Power of LED

1. People actually read LED messages; being conditioned to seeing information at airports, cinemas, highways and train stations.
2. Clearly visible day or night and legible at greater distance than similar-sized illuminated signs.
3. Change messages, at no charge, whenever required. (Static signs cost money to change.)
4. LEDs are reliable, low maintenance, 'Solid State' devices (not globes) that have a long life span of over 100,000 hours. LEDs run on low voltage and use little power, meaning BIG savings on power bills.

Computronics

Established in 1976, Computronics has progressed to become one of the world leaders in the design and manufacture of LED electronic displays.

Computronics is a public company (ASX-CPS), providing inhouse accredited R&D for products built to World's Best Standards.

Service technicians are available Nationwide and all products carry a 2 year warranty for parts and service.
