

Electronic Display Solutions for Education Facilities

Computronics specialises in electronic display solutions for schools, universities and colleges.

LED displays combine low power and low maintenance with unparalleled visibility, making them an excellent choice for education facilities to communicate more effectively.

Applications may include:

- Outdoor Welcome Displays
- Scoreboards
- Notice Boards
- Exam Countdown Clocks
- Event and Directory Display Systems
- Safety Signs
- Room Notice Boards

BUDGET
Scoreboards
from \$3695

Do have something else in mind?

Let the team of designers, engineers, and technicians at Computronics develop an electronic display that is tailored to the facility's needs.

Computronics has 30 years of experience in electronic signs and displays. Browse the Computronics website for further examples of products and applications or contact us today for a no obligation discussion and quote.

Discover the Power of LED

1. People actually read LED messages; being conditioned to reading LED messages at airports, cinemas, roads and train stations.
2. Clearly visible day or night; legible at greater distance than similar-sized illuminated signs.
3. Change messages, at no charge, whenever required. (Static signs cost money to change.)
4. LEDs are reliable, low maintenance, 'Solid State' devices (not globes) that have a long life span of over 100,000 hours. LEDs run on low voltage and use little power, meaning BIG savings on power bills.

Computronics

Established in 1976, Computronics has progressed to become one of the world leaders in the design and manufacture of LED electronic displays.

- A public company (ASX-CPS)
- Inhouse R&D
- Products built to World's Best Standards
- Service technicians available nationwide
- 2 year warranty for parts and service - extended maintenance agreements are available
