EVENTS DIRECTORY BOARDS

The Computronics Events Directory Board is the focal point of the directory system.

Main directory boards strategically positioned at entry points and lobbies offer a personalised greeting that your patrons will instantly recognise by event/function identification.

For larger venues supplementary directory boards can be installed adjacent to lifts , auditorium areas and secondary entry points providing continuity of directory information.

The ability to direct patrons to the correct event or function ensures maximum utilisation of your facilities whilst ensuring functions commence on time with minimal disruptions.

This fully automated system will eliminate the need for staff to continually update manual directories and ensures all details are current with last minute changes being made instantaneously at the control PC.
