

## EVENTS DIRECTORY DOOR CARDS

Event Door Cards are an integral part of the Directory System.

The Door Cards remain fully interactive with the Directory Boards and Management System to display up to the minute data.

Your patrons instantly have the reference of their specific function to guide them through your venue to their function location with minimal supervision from your staff. This is particularly important for multi level and larger venues with the capacity to hold several functions at the same time.

Door Cards can incorporate an optional "occupied switch" inside each room. This allows an occupied message to show on the outside door card ensuring meetings are not disturbed and the occupied status is reported to the Management System PC to alleviate double booking.

An infinite range of Door Card designs and finishes are available to complement your existing decore.
