

EVENTS DIRECTORY SYSTEM

The Computronics Events Management System provides a complete turnkey package of electronic display hardware, user-friendly software and communication options.

This system has proven itself invaluable and a "must have" for hotels and convention centres that require a high level of organization for their busy function schedules.

From the inception of the booking, all event details and display parameters are logged into the database for automatic display and deletion.

Your customers and staff will appreciate the automated operation, up to the minute information and concise directions to their special function or event.

The operating system is available with a large range of LED directory and door card options designed to enhance your existing décor and architectural finishes.

From a corridor of small meeting rooms, atrium lobby to a grand ballroom, Computronics can provide a flexible combination of elegant displays to suit any environment, viewing distance and lighting condition.
