

Electronic Display Solutions for
**Clubs
Pubs & Hotels**

Computronics has a variety of flexible LED, LCD and Plasma electronic display solutions.

LED displays combine low power and low maintenance with unparalleled visibility, making them an excellent choice for adding functionality and style to any location's decor.

Let the team of designers, engineers, and technicians at Computronics design and develop an electronic display that is tailored to your venue's individual needs.

Computronics works hard with your team to provide a total turnkey solution.

Computronics has 30 years of experience in electronic signs and displays. Browse the Computronics website for further examples of products and applications or contact us today for a no obligation discussion and quote.

Discover the Power of LED

1. People actually read LED messages; being accustomed to reading LED messages at airports, cinemas, roads and train stations.
2. Clearly visible day or night; legible at greater distance than similar-sized illuminated signs.
3. Change messages, at no charge, whenever required. (Static signs cost money to change.)
4. LEDs are reliable, low maintenance, 'Solid State' devices (not globes) that have a long life span of over 100,000 hours. LEDs run on low voltage and use little power, meaning BIG savings on power bills.

Computronics

Established in 1976, Computronics has progressed to become one of the world leaders in the design and manufacture of LED electronic displays.

- A public company (ASX-CPS)
- Inhouse R&D
