

MENU BOARDS

Computronics has developed the ultimate Electronic Menu Display System with a wide range of applications from hotels, bistros and food halls to fasts food and drive thru's.

It features bright electronic text and multiple page effects, combined with quality photographic images and increased long range visibility, attracting customers.

Programme the week's menu and forget it - the Computronics Menu Manager Control Software will automatically update your menu panels at selected times and enhance specials with electronic messaging.

Additional benefits include: alternating page information increasing utilisation and promotional messages for bars, gaming and entertainment.

Improve awareness and profitability with the addition of slave displays placed strategically, constantly promoting high margin lines like desserts, coffee and drinks.
