

Electronic Display Solutions for  
**Sport**

**Computronics specialises in a variety of display solutions for both indoor and outdoor sport applications.**

For over 20 years Computronics has led the field in electronic scoreboards.

From single sport scoreboards such as basketball through to multi-sport versions, Computronics provides solutions for any sporting application and budget.

Keeping the spectators both informed and entertained during the game is very important, so Computronics has added to the excitement with extra graphic and text feature options.

Graphic displays get spectators cheering when they see GOAL! and TRY! animated on the scoreboard. Scrolling text messages can inform spectators of statistics and other information during the game.

Standard Computronics Scoreboards can be custom made to include the following options:

- Mono graphic or tri colour displays
- Full colour RGB replay screens
- Programmable scrolling and static single line LED message displays
- Programmable multi line LED display - the whole scoreboard can be programmed to display messages rather than scores while the game is not in play
- Illuminated static light boxes

Contact Computronics to discuss further options and add ons.

Displaying sponsor logos and advertising turns the scoreboard investment into a revenue-raising product.

Scoreboards are controlled using a large range of software options. Computronics can also develop custom software to suite individual application needs.

The team of designers, engineers, technicians and installers at Computronics ensure scoreboards are manufactured to the highest standards and installed efficiently.

**RGB Screens**

Computronics has the latest in full colour replay screen technology. The display is modular in design to suit any application.

**Computronics**

Established in 1976, Computronics has progressed to become one of the world leaders in the design and manufacture of LED electronic displays.

- A public company (ASX-CPS)
- Inhouse R&D
- Products built to World's Best Standards
- Service technicians available nationwide
- 2 year warranty for parts and service - extended maintenance agreements are available
