

Bloomberg Ticker

PROJECT DATA SHEET

BLOOMBERG, THE LEADING GLOBAL PROVIDER OF DATA, NEWS AND ANALYTICS, HAS DISCOVERED THE POWER OF LED AT THEIR OFFICES IN SYDNEY, WITH THE INTRODUCTION OF A LED SINGLE-LINE TICKER DISPLAY.

March 2002

Bloomberg staff and visitors are being kept informed of stock exchange data with a stylish and functional LED display.

Key Features:

- ♦ 1 Line x 208 Characters
- ♦ 150mm Character Height
- ♦ HighBright Red LEDs
- ♦ Computronics' Custom Developed Interface Software (using live data feed supplied by Bloomberg)

This display is recessed into a curved bulkhead.

Computronics was contracted by Rutledge Engineering to supply and install this display.

For further information regarding this project contact Computronics on 1300 888 506.
